SUMMARY

Product Designer focused on consumer products, with strengths in interaction design, visual craft, and product thinking. Led the core learning-experience redesign for an AI-powered learning app and owned design for a social gaming app from launch through major releases. Worked with teams across the UK and US. I also independently design, build, and ship products using AI-assisted development.

EXPERIENCE

Senior Product Designer | ubernatural — Jan 2024 - Feb 2026

International product studio

- Led the core learning-experience redesign for Studypaths, an AI-powered learning app serving 150K+ users across 12 markets. Introduced a guided learning path while preserving existing study tools.
- Owned player-facing design for Dreamerz, a social gaming app, from launch through two major releases. The product reached 27K+ active users globally with Day-1 activation above 70%.
- Used interviews and behavioral analytics to improve onboarding, tournaments, and engagement. An A/B-tested quests redesign increased completion by approximately 20%.
- Delivered product strategy and design for DMG Media / Daily Mail, Verto (YC-backed fintech), and Lingopal (Series A AI startup).
- Joined as the studio's first designer, working directly with founders and engineering leads, mentoring designers, and introducing AI-assisted workflows.

Product Designer | Pink Rabbit Tech — Feb 2023 - Jan 2024

Russia's largest health and wellness platform

- Launched PINK, a content and lifestyle editorial platform that reached 30K+ monthly visits; owned product architecture and end-to-end design, and supported implementation through launch.
- Designed e-commerce features, a checkout redesign, and a nationwide promotional experience. During the three-day campaign, purchase conversion was approximately 35% above baseline.

Product Designer | Okko — Sep - Dec 2023

Contract, part-time | *Russia's leading streaming platform*

- Designed targeted in-app discovery flows and contextual prompts to help parents discover Kids Mode on a streaming platform with 5.7M subscribers, working within an established design system.

UX/UI Designer — 2020 - 2023

Freelance

- Worked across digital products and web for early-stage startups and small businesses; delivered interfaces, prototypes, developer handoffs, and implementation support.

INDEPENDENT PROJECTS

Yonder — 2026

Designed and built a macOS time-zone app for distributed teams.
yonder.site

Todoodle — 2026

Designed, built, and published a Figma checklist widget used by 700+ people.
figma.com/community/widget/1615397206941614227
